CS131: Programming Languages
Academic Honesty Policy
March 29, 2011

1. Each student must turn in his/her own homework assignment. The code in this assignment must be your code; the words must be your words. One consequence of this rule: **If you cannot explain your assignment to me (why you did it the way you did, how it works, etc.), then you have violated our policy.**

2. You can learn a lot from others in the class, and I encourage you to do so. Therefore, you are allowed to talk to others in the class about the course content and about the assignments. You must simply list these people at the top of your assignment. One consequence of this rule: **You cannot violate the policy by listing collaborators, only by omitting the names of collaborators.**

3. You are also allowed to use resources such as books or the Web. Again, you must simply list these resources at the top of your assignment. However, **you may not use old solution sets, from this or any other class, for any reason**.

Violations of this policy will be reported to the Dean, who does a full investigation. If found guilty, these investigations often result in suspension or dismissal from the University.

In order to have any work graded, you must sign and return this form.

I have read, understood, and agreed to abide by this policy.
